## COLLEGES OF AGRICULTURE AND ENGINEERING

Department of Agricultural Engineering

February 9, 1970

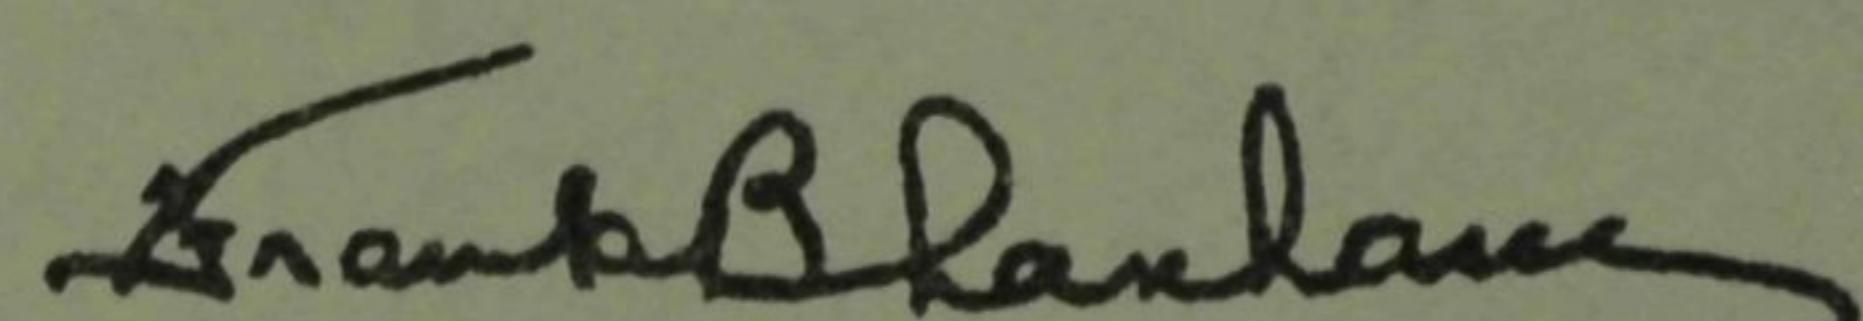

### AGRICULTURAL ENGINEERING OPEN HOUSE

You are invited to bring your students to our Open House at the Agricultural Engineering Building on Friday afternoon, March 6 or all day Saturday, March 7. There will be an opportunity to visit with students and staff about the fields of agricultural engineering and mechanization.

In addition, there will be exhibits on tractor operator comfort, a new soybean header, computerizing water runoff information, grain damage in processing, new developments in concrete wall panels, and simulation of hail damage.

Other College of Engineering departments are having open houses at the same time. Come see our exhibits and have coffee and donuts. Then we will provide transportation to and from the north end of the campus so you and your guests can visit the other exhibits without finding a new parking space. Parking is easier to find near our building than on the north end. But on Friday it is tight even in our area. Come on Saturday and enjoy yourself.

Sincerely yours,

Frank B. Lanham  
Head of Department
